23rd August 2019

To Whom It May Concern,

Reference Letter for Mr. CHONG Kin Ye, Jacky

This is to certify that Mr. CHONG Kin Ye Jacky, a third year Electronic Engineering student of The Hong Kong University of Science and Technology, has completed his vacation training in the Electrical Department of Projects Division of this company from 2nd July 2019 to 26th August 2019.

Jacky participated in the eight-week training programme with introduction to design and basic operation of power generation facilities and transmission system. The training programme also included one week of on-site training in Lamma Power Station and various technical presentations delivered by our electrical, mechanical and civil engineers.

During the training period, Jacky participated in a project for the cyber security and operation system of a generation plant. He understood the importance of cyber security though studying several standards. Apart from that, he, as a student majoring in electronic engineering, he tried his best to acquire knowledge about electrical system.

Through job-shadowing project engineers and visiting various project sites, he acquired valuable technical knowledge in both design and site works, and gained practical experience in project management. The training has afforded him the opportunity to gain actual field experience congenial to his interest and studies.

Throughout the training period, Jacky demonstrated good working attitude and enthusiasm to learn, and got along well with his supervisors and peers. I wish him every success in his studies and future career development.

Yours faithfully,

C.K. Lau

GENERAL MANAGER (PROJECTS)
